SYSTEMS ADMINISTRATOR (Cloud & Security-Focused)

Hands-on Systems Administrator supporting Linux and AWS environments in secure settings. Skilled in patching, troubleshooting, vulnerability remediation, and maintaining system stability in high-security environments.

PROFESSIONAL EXPERIENCE

Systems Administrator (Cloud Environment)

Accenture Federal Services – Office of Naval Intelligence

Sept 2023 - Present

Progression: Systems Administrator (Cloud) → Systems Administrator → Database Systems Administrator (Junior)

- Maintain and support secure Linux-based systems
- Perform system patching, updates, and troubleshooting across multiple environments
- Analyze vulnerability scan results (e.g., Nessus) and support remediation efforts
- Provision and manage AWS-hosted systems (EC2, EBS, snapshots)
- Resolve SSH connectivity and system access issues
- Execute system hardening and ensure compliance with security standards
- Create backups and snapshots to support system recovery operations

Information System Security Officer (ISSO)

Tunuva Technologies / Parsons – NRO

Nov 2022 – Aug 2023

Fort Belvoir, VA

- Supported security operations through continuous monitoring, vulnerability tracking, and remediation efforts in secure environments
- Tracked vulnerabilities and assisted with remediation efforts
- Maintained system security documentation and accreditation artifacts
- Coordinated with technical teams to ensure systems met security requirements

Systems Administrator

Apex Systems / Leidos – NGA

May 2022 – Oct 2022

- Installed, configured, and maintained systems in enterprise environments
- Resolved service tickets and provided Tier 1/2 user support
- Assisted with system updates, maintenance, and performance improvements

LICENSES & CERTIFICATIONS

- | | |
|---------------------------------|--|
| • Security+ CE (Active) | • AWS Solutions Architect – Associate (2024) |
| • AWS Cloud Practitioner (2024) | • AWS AI Practitioner (2026) |

TECHNICAL SKILLS

- **Operating Systems:** Linux (RHEL), Windows Server
- **Cloud:** AWS (EC2, EBS, core services)
- **Security:** Vulnerability Remediation, System Hardening, Security Scanning
- **Tools:** ServiceNow, Jira, Confluence, Splunk, Nessus
- **Security Tools:** ACAS, SCAP, STIG Hardening

EDUCATION

December 2021

BACHELOR OF SCIENCE, INFORMATION TECHNOLOGY (CYBER SECURITY)

Strayer University
