📍 District Heights, MD | 📞 240.383.8565 | ✉️ tanara.taylor@yahoo.com | [linkedin.com/in/taylortanara](https://www.linkedin.com/in/taylortanara)

Technology Architect with expertise in secure cloud engineering, RMF-aligned system hardening, and vulnerability management within classified DoD environments. Proven experience designing and maintaining AWS and Red Hat-based infrastructures, leading automation initiatives, and supporting continuous monitoring across air-gapped and mission-critical systems. Known for translating complex security and operational requirements into scalable, compliant, and resilient solutions.

PROFESSIONAL EXPERIENCE

Accenture Federal Services | Office of Naval Intelligence | NMIC

CLOUD ENGINEER | TECH ARCHITECTURE SPECIALIST

Dec 2025 - Present

- Design, develop, and maintain tailored cloud and system architectures supporting mission-critical DoD operations.
- Translate business and security requirements into actionable technical architectures across AWS, Linux, and automation platforms.
- Lead troubleshooting, patching, and performance optimization for high-availability systems.
- Support secure system operations leveraging AWS, Red Hat, CI/CD pipelines, ServiceNow, and enterprise security platforms.
- Collaborate cross-functionally with developers, cybersecurity teams, infrastructure engineers, and product owners to ensure architectural alignment with organizational goals.
- Drive innovation through automation and continuous improvement in complex, high-pressure environments.
- Supported ACAS (Assured Compliance Assessment Solution) vulnerability scanning and validation across AWS-hosted Linux instances in classified and air-gapped environments.
- Reviewed and remediated ACAS findings, validating STIG compliance and coordinating vulnerability mitigation with cybersecurity teams.
- Conducted SCAP scans and applied DISA STIG hardening procedures to ensure RMF compliance across Red Hat-based systems.
- Assisted in documenting remediation efforts and vulnerability status for RMF artifact updates and continuous monitoring reporting.

CLOUD ENGINEER | CUSTOM SOFTWARE ENGINEERING SPECIALIST

Sept. 2024 – Dec 2025

- Managed patching, monitoring, and compliance through Red Hat Satellite and Ansible Automation Platform in both production and air-gapped environments.
- Successfully upgraded Ansible Tower to AAP 2.4.9 in a JWICS production environment, ensuring system continuity and secure integration.
- Led Nessus Manager plugin validation and coordinated approval processes for security upgrades within classified enclaves.
- Resolved secure connectivity issues (SSH / AWS SSM), performed kernel updates, and troubleshooted cloud resource issues across multiple environments.

CLOUD ENGINEER | INFRA TRANSFORMATION SPECIALIST

Jan 2024 – Sept 2024

- Deployed, managed, and optimized cloud-based systems and applications in AWS, ensuring secure and efficient data storage and system performance.
- Configured and maintained cloud infrastructure, including networking and security services, adhering to industry best practices.
- Performed regular system maintenance on Windows and Linux instances, ensuring system integrity and security.
- Developed cloud-based applications and databases with a focus on high performance and scalability.
- Monitored and optimized cloud services, troubleshooting and making necessary adjustments to enhance efficiency.
- Collaborated with vendors to manage costs, scalability, and performance, ensuring systems meet business and budget requirements.
- Designed and implemented secure network solutions to meet business and security needs.
- Automated AWS services using scripting languages such as Python and Perl, reducing manual intervention and increasing operational efficiency.
- Deployed cloud applications using EC2 and Elastic Beanstalk, ensuring uptime and scalability.
- Developed and tested disaster recovery plans to ensure system resilience and recovery capabilities.
- Performed infrastructure upgrades, minimizing downtime while optimizing system efficiency.
- Built tools for monitoring, deploying, and troubleshooting AWS resources to maintain seamless cloud operations.

DATABASE SYSTEM ADMINISTARTOR

Sept 2023 – Dec 2023

- Administered, developed, tested, and maintained enterprise databases across multiple teams.
- Supported database design, installation, backup/recovery, performance tuning, and configuration management.
- Provided technical input for documentation, procedures, and problem resolution related to day-to-day database operations.
- Maintained 100% STIG compliance prior to authorization review.

Tunuva Technologies, Inc. | Parsons Corporation | National Reconnaissance Office | Aerospace Data Facility- East PROGRAM INFORMATION SYSTEM SECURITY OFFICER LEVEL III

Nov 2022 – Aug 2023

Fort Belvoir, VA

- Supported RMF implementation activities, including control validation and continuous monitoring tasks.
- Conducted SCAP scans and vulnerability assessments using ACAS and other automated assessment tools.
- Assisted in maintaining RMF artifacts, including System Security Plans (SSP), POA&Ms, and Security Control Assessment documentation.
- Supported Authorization & Accreditation (A&A) processes for classified systems.
- Coordinated vulnerability remediation and tracked compliance in alignment with DON cybersecurity policies and directives.
- Performed weekly CVE review and patch validation to maintain compliance with STIG and CIS benchmark standards.

Apex Systems | Leidos | NGA

Systems Administrator

May 2022 – Oct 2022

- Performed installations, upgrades, and troubleshooting of cloud-based systems and hardware.
- Analyzed cloud service tickets, providing efficient resolutions and ensuring SLA compliance.
- Provided end-user support for AWS-based applications, offering training in best practices.
- Migrated legacy systems to cloud environments, improving operational efficiency.
- Conducted regular audits to ensure adherence to cloud security policies.

EDUCATION

December 2021

BACHELOR OF SCIENCE, INFORMATION TECHNOLOGY | CYBER SECURITY

Strayer University, Camp Springs, MD

August 2012

ASSOCIATES OF ARTS, FOUNDATIONS OF BUSINESS

University of Phoenix, Tempe, AZ

LICENSES & CERTIFICATIONS

- AWS Solutions Architect – Associates - 2024
- AWS AI Practitioner – 2026
- Risk Management Framework – 2022
- Ethical Hacker Pro Certified – 2021
- PC Pro Certified - 2020
- AWS Cloud Practitioner - Foundational - 2024
- RedHat CSA – In Progress
- Security + CE License - 2021
- Network Pro Certified - 2020
- Project Management Certification - 2019

TECHNICAL SKILLS & SOFTWARE PROFICIENCIES

- Detailed Activity Logs – JIRA & Confluence
- Systems Configuration Manager
- Amazon Web Services
- Service + / ServiceNOW
- ACAS & DoD Repository
- RedHat Linux
- Risk Management Assessments
- Personnel Information Systems
- Security Operations
- Complex Problem-Solving
- Patching & System Hardening
- GitLab / GitHub
- TALON / SAP/Splunk/ArcSight
- STIG Compliance / Validation

HONOR, AWARDS & ORGANIZATIONS

- Golden Key International Honor Society
- Alpha Sigma Lambda Honor Society
- The National Society of Leadership & Success
- Technology Development Program
- The Society of Collegiate Leadership & Achievement
- Alpha Chi National College Honor Society
- Sigma Chi Psi Sorority, Incorporated
